

## MAVA200 DECONTAMINATION SPRAYER

MAVA200 is effective decontamination sprayer for first responders of Defence Forces and Fire Fighters.

It is durable, portable and easy to use. Integrated blender allows you to produce decontaminant inside the container effectively even from the granular components. MAVA200 is a result of ten years of product development according to high requirements of Finnish Defence Forces.

MAVA200 is used for decontaminating **B** and **C** (chemical and biological) **agents** from vehicles, vessels and equipment providing fast decontamination of small areas on the scene.

Thin coat of white emulsion is produced and sprayed over contaminated target by MAVA200 Decontamination Sprayer. All decontamination agents in the market are suitable for MAVA200. However E-96 Decontamination Emulsion is specially designed to be used with MAVA200.

Technical Features	
Total volume	9,8 litres
Operational volume	7,0 litres
Weight empty	9,8 kg
Weight full (E-96)	18,5 kg
Coverage	14 m <sup>2</sup> (E-96)
Operating pressure	Max 5 bars (empties the container by one pressurization). Pump capability 13 bars
Operating temperature	-25C° ... +40C°
Main metal parts	Stainless steel (AISI316)
Height	670 mm
Container diameter	204 mm
Adapters and nozzles	Stainless steel (AISI316) and brass
Gaskets	Viton
Structure	Welded together (all wear away parts can be replaced)
Hose	PTFE, Stainless steel cover, rotary joints
Used decontaminant	E-96 and all available decontaminants
NATO Stock Number	NSN-4230-26-300-1911
Options	Vehicle installation rack
